

"The Wenger instrument storage cabinets look great and will be very functional for years to come. They will also help protect our investment – we probably have \$400,000 worth of instruments, along with a number of student-owned instruments that we are storing. With over 300 instruments in the cabinets, we chose the grille doors to make instrument inventory easier."

*– Tim Diem, Director of Marching Band,
University of Minnesota,
Minneapolis, Minnesota*

University of Minnesota, TCF Bank Stadium, Minneapolis, Minnesota

INSTRUMENT AND GARMENT STORAGE

Instrument Storage Cabinets

Pages 52-61

The most trusted way to secure and protect valuable instruments. Available in a variety of colors, sizes and styles.

AcustiCabinets™

Page 53

Instrument storage cabinets that are designed to be an integral part of your room's acoustical treatment.

Attic Storage

Page 57

New soft-sided storage protects equipment and creates storage space on top of your instrument storage cabinets.

Percussion Workstation

Page 58

A lockable, mobile storage solution and practical work area all rolled into one single durable tool.

Tuba/Sousaphone Rack

Page 59

Move and store any combination of tubas and sousaphones safely and securely.

Guitar Rack

Page 60

Exceptional protection for cased or uncased acoustic or electric guitars, mariachi guitars or guitarons.

Stringed Instrument Racks

Page 61

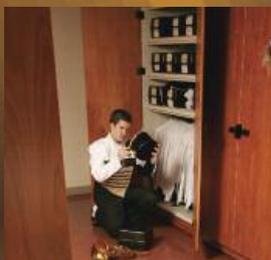

Safely store and transport Cellos, Basses, Violins and Violas.

Rack 'n Roll® Garment Rack

Page 62

The easy way to move garments from place to place.

Garment Storage Cabinets

Page 63

Whether it's band uniforms, choir robes, or theatre costumes, these cabinets protect and store them safely and neatly.

Music Library System

Page 64

Cut your sheet music storage space needs by more than 50% with our high-density storage solution.

Music Sorting Rack

Page 65

A portable, rolling cabinet for sorting and distributing sheet music. Works in conjunction with our Music Library System.

Folio Cabinets

Pages 66-67

Keep all your folios organized and right where you want them. Now in new sizes.

ONBOARD® TRANSPORT CARTS ON PAGES 70-77.

Instrument Storage Cabinets

Our patented polyethylene shelves are just part of the best-built, most-reliable storage cabinets available. Heavy-duty hardware and top-quality doors further ensure reliable day-to-day operation and unparalleled durability when you buy Wenger storage cabinets.

Wenger cabinets are also designed to look great with virtually any décor. They're available in a range of sizes, colors and styles to fit a wide variety of needs. That includes different door types for different applications. Plus, our cabinets are modular so you can rearrange and even add units as needed.

USAGE

Storage to help protect instruments and avoid traffic jams

*Environmentally
responsible*

PERFORMANCE REQUIREMENTS

- Choice of solid doors, straight grille doors or no doors
- Waterfall grille doors available for an extra charge
- Handsome polyester laminate and thermofused composite wood core resists chipping and looks new years longer than other laminates
- Shelves feature patented ventilation ridges and rounded front edges, improving airflow crucial to musical instrument, equipment, and garment longevity
- Load-tested hinges and lock assemblies stand up to institutional use
- 84" (213.36 cm), 68" (172.72 cm) and 38" (96.52 cm) heights available to meet your students' needs. (Middle school and elementary school students cannot easily reach storage compartments more than 68" (173 cm) off the floor.)
- 27¹/₂" (69.85cm) and 21" (53.34 cm) widths available

CONSTRUCTION

- Heavy-duty polyester laminate is adhered to ³/₄" (19 mm) thermofused industrial-grade composite wood
- Available with right- or left-hinged (standard) doors for easy access
- Bolt-through construction maintains superior door and hardware condition, year after year
- Seismic-compliant bracing available upon request as a special order
- Available in four core substrates to meet your specific needs: industrial-grade composite wood (standard), environmentally sensitive (no added urea formaldehyde), moisture-resistant, FSC certified, and Vencore (plywood)
- 10-year warranty
- Available in all the color combinations shown on page 55

ORDERING INFORMATION

Wenger Instrument Storage Cabinets come in a wide variety of configurations, colors and sizes. Please call your Wenger representative so that we can understand your needs in order to provide the best solution and an estimate to help you budget your investment.

Another great option from Wenger!
GearBoss storage and transport carts will revolutionize your storage room and save you tons of space! GearBoss® X-Carts, Team Carts, SportCarts and shelving (pages 78-83) are smart storage that will protect your music instrument, uniform, athletic or costume investment.

AcustiCabinets™

Need to have instrument storage in your rehearsal room? Here's a way to minimize the loss of cubic volume, provide sound absorption, and help eliminate flutter echo caused by direct sound reflection.

After working closely with acoustical consultants, Wenger has developed an instrument storage cabinet that combines specially designed grille doors, acoustically absorptive material and reliable durability to produce storage that can help enhance the room's acoustical performance.

USAGE

Instrument storage that's engineered to be an integral part of your room's acoustical treatment

PERFORMANCE REQUIREMENTS

- Waterfall design on grille doors provides a distinctive look, minimizes a room's cubic volume loss and reduces vibration
- Solid steel lockable doors provide protection from theft or damage
- Environmentally friendly, acoustically absorptive material helps eliminate sound reflection
- Patented polyethylene shelves, bolt-through construction, and heavy-duty hardware for unmatched durability

CONSTRUCTION

- Available in all standard Wenger cabinet sizes 1-28 and 51-61 standard and narrow (see pages 56-57)
- Compartment grille door sizes are available for all standard Wenger cabinet sizes 1-28 and 51-61
- Corner Cabinets not available in this configuration
- Available in all seven standard color combinations shown on page 55
- End cover panels available in all colors shown on page 55
- Patent pending

ORDERING INFORMATION

See pages 55-57 for sizes, colors and ordering information

Easily Configured

AcustiCabinets are available in many of the same configurations that our traditional cabinets come in. See pages 56-57 for the variety of options.

Four cabinets shown:
#6, #4, #4 and #10

Waterfall Grille Doors

Unique curved grille door design provides a distinctive look, minimizes a room's cubic volume loss and reduces vibration.

Acoustically Absorptive Materials

The environmentally friendly material at the back of the AcustiCabinet helps eliminate direct sound reflection while absorbing high and low frequencies.

Number Plates and Locks

You can add number cards to your AcustiCabinets and lock them with standard combination locks just like traditional Wenger cabinets (locks not included).

Wenger Quality Construction

Like all Wenger cabinets, AcustiCabinets are built with the same heavy-duty construction for maximum performance and durability.

Solve rehearsal room storage problems without creating sound problems.

WITHOUT ANY TREATMENT

A rehearsal room without any cabinets or acoustic treatments will have excessive loudness, flutter echoes and could possibly cause hearing loss over extended periods of time.

WITH ORDINARY STORAGE CABINETS

A rehearsal room with instrument storage cabinets succeeds in diffusing some sound but has little effect in quieting loudness or absorbing high and low frequencies.

WITH WENGER ACOUSTICABINETS

A rehearsal room with Wenger's new AcustiCabinets and used in conjunction with absorber and diffuser panels can create an acoustically balanced environment. Loudness is controlled and balanced over the full audible range.

Instrument Storage Cabinet Comparison Page

There are distinct advantages to buying Instrument Storage Cabinets from Wenger rather than from a less qualified manufacturer or, even worse, building your own. It all comes down to one word: durability. Our cabinets have been tested in the field through tough daily use by thousands of musicians day in and day out for years. No other cabinets give you better longevity for your money. Ask anyone who's ever owned an inferior set of cabinets and they'll tell you that scrimping on storage costs you more in the long run.

	WENGER	OTHER SUPPLIERS
<p>BOLT-THROUGH CONSTRUCTION All Wenger hinges and lock assemblies are attached with tamper-proof bolts that run completely through the door and cabinet side panel.</p>	 <p>Bolted hardware ensures security and durability.</p>	 <p>Hardware secured with screws become loose over time and may cause the cabinet side panel to crack or split.</p>  <p>Without tamper-resistant bolts, doors can become separated from the cabinet side panel.</p>
<p>DURABLE SHELVES Superior Wenger construction takes on the daily bumps and bruises without chipping, cracking, or splintering. Our shelves won't separate or peel. Plus, they're easy to clean and secure with tamper-resistant attachments.</p>	 <p>Wenger cabinets are extremely durable and stay looking new for years. In addition, Wenger cabinets are constructed based on the dimensions of each instrument with extra space for storage.</p>	 <p>Cabinet construction with sharp edges and cramped spacing can result in damage to both cabinets and instruments.</p>  <p>Poor construction and inferior materials will cause the cabinets to damage easily and show wear after a short time.</p>
<p>HARD-WEARING HARDWARE Wenger performs a load-test on storage cabinet doors with more than 300 lbs (136 kg) of pressure on the outer edge. The patented lock-bar is 12-gauge steel, and the heavy-duty strike plate ensures our tamper-resistant lock closes with continued precision.</p>	 <p>Load-tested hinges and lock assemblies stand up to heavy use.</p>	 <p>Doors constructed with inferior hardware can become easily damaged and require constant repair.</p>  <p>Poorly constructed doors compromise the integrity of the cabinet.</p>
<p>PROTECTION FOR YOUR INVESTMENTS Wenger storage cabinets offer outstanding protection from theft, vandalism and accidents. The broadest, most durable storage solution is designed by experts to improve traffic flow and increase storage capacity.</p>	 <p>Wenger cabinets are virtually impenetrable and constructed to avoid potential damage to valuable instruments.</p>	 <p>Instruments and cases can become damaged by the hardware on the cabinet.</p>  <p>Security of instruments can be compromised due to poor construction and inferior components.</p>

"I compared cabinets from several manufacturers and chose Wenger because of the quality. Wenger also designed a configuration of cabinets that enables us to fit more instruments into the storage room. Wenger cabinets are holding up great – they've functioned just like we knew they would."

— Dr. Jeff Laird, Director of Bands, Aldine High School, Houston, Texas

"Wenger cabinets are great! I don't think anything out there is made better. Our old wooden shelves were more expensive than Wenger shelves and they didn't last. There would be wood shavings on the floor from kids dragging cases in and out of the shelves. Over time, the shelves almost were sawed away. These Wenger cabinets are really solid."

— Eric Harris, Band Director & Music Dept. Chair, Vance High School, Charlotte, North Carolina

"When it comes to purchasing storage cabinets for instruments, equipment or music, Wenger is the logical choice. There are a lot of cheaper options out there, but you lose the durability and security. Demonstrating the durability of Wenger equipment was easy because our high school was still using Wenger percussion and folio cabinets that were 30 years old. This equipment was still in good shape and working well."

— Chris Blackmer, Director of Bands, Kearsley High School, Flint, Michigan

With all our cabinet sizes, configuring just the right storage for your needs is easy.

Wenger cabinets come in a wide variety of configurations to meet your storage needs. Use the information on this pullout page or call your Wenger Representative for a consultation. Using your instrument list and our exclusive software program, we'll analyze your needs and space requirements and create an Instrument Storage layout using the most suitable cabinets.

Wenger cabinets come in different depths, heights and widths.

A storage room, wall or hallway contains a mix of different cabinets and compartment sizes. We make it easy by telling you what instruments will fit in which compartments.

Choose your color! See the options at right for options.

Large instruments like cellos? We have a cabinet for those too.

We'll help you plan your space to make the best use of high-traffic areas.

Narrow widths are available for most cabinet sizes.

Choose your door style! See the back side of this pullout spread for options.

The sizes to fit, your space, your instruments, and your needs.

Those who have worked with Wenger for their instrument storage needs can attest – our expertise and experience will give you the best storage solution for your program. You'll experience the industry's finest construction and security within a layout that makes the most of your space while also improving traffic flow and daily convenience. Wenger cabinets also offer choices in design and aesthetics that make it easy for you to choose the ideal solution for special situations. We'll work with you to make sure your design is exactly what you're thinking every step of the way – that means no surprises in cost, delivery, or quality. And we'll support you after installation, with quick response and a friendly, positive approach focused on your satisfaction. Please call and let's start creating something perfect for you.

Stringed Instrument Cabinet

Now you can store a variety of stringed instruments easily and securely in one location. The unique interior design allows you to configure it for storing bass, cello, violin, viola, guitar, and even Mariachi instruments such as Guitarron and Vihuela.

USAGE

Store a variety of stringed instruments securely in one location

PERFORMANCE REQUIREMENTS

- Attractive, durable construction resists chipping and looks new years longer than other laminates
- Can be configured for instruments with or without cases
- Bolt-through construction maintains superior door and hardware condition, year after year
- Removable, replaceable components ensure improved service life
- Load-tested hinges and lock assemblies stand up to institutional use
- Choice of solid doors, straight grille doors or no doors
- Waterfall grille doors available for an extra charge
- Available in seven color combinations (see page 55)
- 10-year warranty

Neck holder for uncased instruments (shown with lock)

CONSTRUCTION

- Cabinet height: 85 5/8" h x 60 1/4" w x 39 1/4" d (217 cm x 153 cm x 100 cm)
- Additional conversion kits to store additional instruments available
- Optional hangers and cable lock kit available for instruments without cases.
- Heavy-duty polyester laminate is adhered to 3/4" (19 mm) thermofused composite wood
- Available in all core materials (see page 55)
- Ships ready-to-assemble

38" (96.5 cm) High Instrument Storage Cabinets

It's the perfect height for most music classrooms and rehearsal rooms. Our unique work surface top design guarantees you plenty of space to assemble, disassemble, clean, and work with all kinds of musical instruments. The height and design provide ultimate room layout flexibility – create islands, improve supervisor sightlines, and even place cabinets under most windows.

The work surface tops are made with a tough laminate and banded on all four sides for long-wear durability. All sizes will be offered as standard cabinets or AcoustiCabinets™ except for the General Storage cabinet, which is available with wood compartment doors.

*Add 1 1/8" (2.86 cm) to Height of Storage Cabinets when HPL work surface top is included

- Work surface tops must be specified at time of order. Color - granite.
- Full wood doors are not available on 38" high cabinets.
- Cabinets included: #50-62

Cabinet #52 and #54 shown with high-pressure laminate work surface

Attic Storage

Do you have wasted space above your storage cabinets? Here's the ideal dust-free, well-protected solution to making use of that space to safeguard items such as marching band equipment or even sombreros. Each Attic Storage cover is made of rugged, durable polyester that is supported by a sturdy, lightweight frame. Available in an assortment of sizes that fit the top of any cabinet.

"I love our Storage Attics! They keep instruments and equipment safe, out of sight and dust-free. The extra storage space is wonderful. Storing drum harnesses in them frees up other lockers for large instruments."

*— Cheryl Yee Glass,
Band Director
San Ramon Valley
High School
Danville, California*

USAGE

Perfect way to use formerly wasted space above cabinets to store equipment

PERFORMANCE REQUIREMENTS

- Cover protects against dust
- Frame protects equipment against damage
- Available in a variety of sizes

CONSTRUCTION

- Cover is lightweight, durable 600 Denier Polyester
- Cover is PVC backed (non fire-rated)
- 8 mm zipper with large pulls
- Attic floor is 3/4" (2 cm) thick industrial grade composite wood with oyster laminate finish
- Load capacity not to exceed 40 lbs (18 kg) per linear foot of width, evenly distributed
- Frame is 3/4" (2 cm) steel square tube finished in black epoxy powder paint

Percussion Workstation

Just roll it into place and you're ready to play. Wenger's Percussion Workstation lets you take everything from cowbells to cymbals with you in a self-contained performance station.

Shown in Solar Oak finish

"Everything students need for a given piece of music can be stored on the Percussion Workstation, along with sticks and mallets. I like how it rolls easily. The drawers also slide out easily and hold a lot."

— Bruce Tipton, Band Director,
Vanden High School, Fairfield, California

USAGE

A lockable storage solution and practical work area that keeps percussion instruments organized and ready to play

PERFORMANCE REQUIREMENTS

- Large, extremely practical 48" x 24" (122 cm x 61 cm) worktop
- Padded top silences instruments not in use
- Four heavy-duty casters glide over any surface and provide great stability
- Four foam-lined drawers store triangles, sand blocks, brushes, drumsticks, mallets, tambourines, maracas, and other small items
- Lower compartment for parade and snare drums
- Shelves hold the largest standard-size cymbals

CONSTRUCTION

- Available in the colors shown at right
- Some assembly required

Tuba/Sousaphone Mobile Storage Rack

The perfect way to move and store any combination of tubas and sousaphones safely and securely. It lets you hold a full range of instrument sizes and easily adjust. Heavy-duty casters with locking mechanisms keep the rack stable for fixed storage. Environmentally friendly – made from renewable forest resources.

USAGE

Easy, sturdy, safe way to move and store tubas and sousaphones

PERFORMANCE REQUIREMENTS

- Available in 3-Unit or 4-Unit sizes
- Instruments fit securely into “yokes” which can be adjusted horizontally and vertically
- Units can be easily configured to hold tubas, sousaphones, or a combination
- Attractive natural finish is similar in appearance, strength, and hardness to oak. Cherry finish available

CONSTRUCTION

- Made from renewable forest resources
- 3-Unit is 77¼" w x 32" d x 39½" h (196 cm x 81 cm x 100 cm)
- 4-Unit is 101¼" w x 32" d x 39½" h (257 cm x 81 cm x 100 cm)
- Racks have four swivel casters for easy transport
- Locking mechanisms on two wheels
- 5-year warranty

Rack 'n Roll® Garment Rack

This is the easy, smart way to move your bulky garments, gowns, coats, and uniforms from storage to rehearsal or performance for a fast change. The Rack 'n Roll garment rack is heavy-duty enough to hold a full wardrobe but designed so efficiently it can easily roll through standard doorways or elevators. Now you can keep your valuable investments off the floor when you need to move them – so no more soiled or torn costumes. Garment racks are available in both a 4' (10.2 cm) and 6' (15.2 cm) model. And they're so well-designed, they can be easily disassembled without tools.

USAGE

The perfect way to move bulky uniforms, robes, and concert wear

PERFORMANCE REQUIREMENTS

- Extremely easy and quick to assemble or take apart. No tools required.
- 14-gauge steel bottom shelf and 16-gauge steel top shelf for extreme durability. Black powder coat paint finish
- Two all-swivel and two rigid non-marking casters for easy maneuvering

CONSTRUCTION

- Hanger bar is constructed of 11-gauge 1 1/4" (3 cm) round tubing
- Uprights constructed of 13-gauge 1 1/2" (4 cm) round tubing
- Basket (1 included) organizes smaller items and folds flat when not in use
- 4' (1.2 m) model holds approximately 23 garments. 6' (1.8 m) holds approximately 35 garments
- Fits through standard 32" (81 cm) doors
- 4' (1.2 m) model designed for use in passenger elevators (minimum elevator size: 5' (1.5 cm))
- Optional accessories: Additional folding basket, costume dividers, dust cover, privacy screen, hanger retainer clips

STORAGE

- Stores compactly. Allow 70 1/2" (179 cm) for height. 4' (122 cm) model stores in 24" x 50" (61 cm x 128 cm) floor space. 6' model (183 cm) model stores in 24" x 73 1/2" (61 cm x 187 cm) floor space

ORDERING INFORMATION

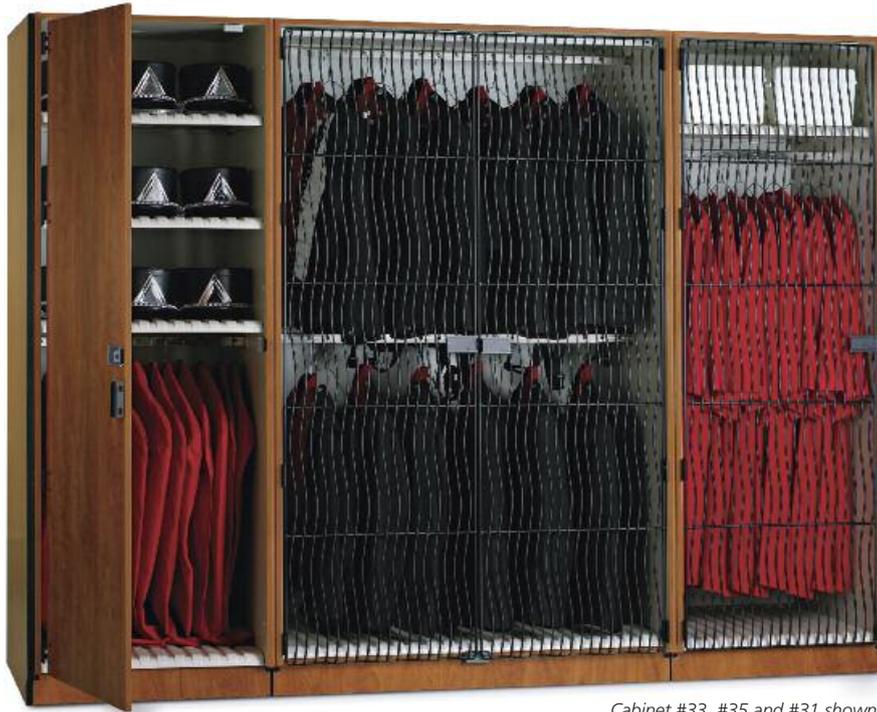

028B001	4' (1.2 m) Rack 'n Roll, 192 lbs (87 kg)\$652

Units completely disassemble without tools and stack up to 4 units high for compact storage. (2 units shown)

Robe and Uniform Cabinets

Garments are an investment you most likely wouldn't be able to replace for a long time. That's why you need the exceptional protection from moisture, dust, mildew and theft you'll get from Wenger Robe and Uniform Cabinets. They're the ideal solutions for storing all your robes, marching band uniforms, hats, and shoes.

Cabinet #33, #35 and #31 shown

USAGE

Secure, well-ventilated storage that keeps your garments free from wrinkles and mildew so you can wear them right off the hanger

PERFORMANCE REQUIREMENTS

- Patented polyethylene-ridged shelves last longer than any others and allow air to circulate around hats and caps
- Special venting holes help dissipate moisture, mildew, and odors
- Lockable grille (padlock supplied by owner) and solid (optional) doors prevent theft

CONSTRUCTION

- 2" (5 cm) hanger spacing prevents wrinkles.
- Choice of lockable full-length solid, grille, waterfall grille doors (shown), or an open door design
- Solid doors reduce dust build-up
- Bolt-through construction and tamper-resistant hardware
- 10-year warranty

GearBoss® storage solutions offer great security, mobility and space savings! See pages 78-83.

- Stationary Shelf Garment Storage
- Equipment Storage
- Revolving Shelf Garment Storage
- Flag Storage

Assembly required on cabinets #34, #35, #36 and #41

Music Library System

It shouldn't take longer to find a piece of music than it does to play it. Our system has a patented high-density, roll-out design that's reliable, durable and cuts storage space nearly in half compared to regular file cabinets.

If you're an average band, orchestra or choir program with 1,000 titles, you'll need more than ten 4-drawer file cabinets that take up 13½' (4 m) of wall space. But our innovative Music Library System stores that same amount of music in a single design that takes up only 5' 8" (173 cm) of wall space.

Five 7-shelf units shown with end cover
Boxes not included

Shown in
Pebble finish

USAGE

Storage options that cut sheet music storage by more than half

PERFORMANCE REQUIREMENTS

- High-density slide-out design minimizes storage space
- Organizes music with a systematic approach that can save hours – even days – of searching
- Roll-out design economizes space and creates a clean, organized appearance
- Designed to accommodate the majority of music filing boxes, end-tab file folders, and envelopes

CONSTRUCTION

- Compartment size is 10.5"h x 13"d (26.7 cm x 33 cm)
- Rugged square tubular frame
- 34½" wide plywood-core shelves coated in a protective polyester laminate
- Each unit is 44"d (112 cm) and 16"w (41 cm) in the closed position
- Total depth of each cabinet is 80" (203 cm) in the open position
- Colors: Interior, shelves and base are Oyster. End cover and front panels available in all the colors shown on page 55
- Fully loaded units can weigh up to 980 lbs. Contact Wenger for safe placement info
- See installation requirements including minimum ceiling heights at right
- Optional lock kit available

ORDERING INFORMATION

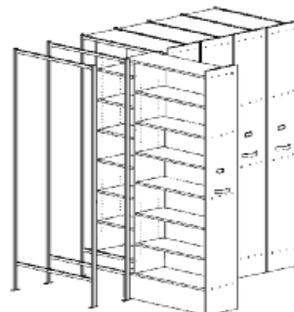

173E600	6-Shelf Music Library Unit, 260 lbs (117.9 kg)\$1,360
173E700	7-Shelf Music Library Unit, 281 lbs (127.5 kg)\$1,395

173E245	Lock Kit, 1 lb. (.45 kg)\$50
173E240	4-Pack Lock Kit, 3 lbs (1.5 kg)\$115

To accommodate 1,000 titles, each 1" (2.5 cm) thick, an average-size music program requires up to 10 four-drawer file cabinets that take up 13½' (4.1 m) of wall space.

Wenger's roll-out shelf design lets you store those same 1,000 titles in a 4-unit, 7-shelf system that takes up only 5'8" (1.7 m) of wall space.

- 6-shelf units are 81½" (204 cm) high requiring a minimum ceiling height of 7' (2.1 m). 7-shelf units are 92" (235 cm) high requiring a minimum ceiling height of 8' (2.4 m)
- Total depth of each cabinet is 6' 6" (198 cm) when open, requiring a minimum room depth of 7' (213 cm)

"The Music Library cabinets are awesome – I wish I had more. They make it easy to store and organize everything. We have approximately 2,500 titles in our 16 units."

– Dan Baker,
Choir Director & Music
Department Chair,
Northridge High School,
Middlebury, Indiana

HOW TO DETERMINE THE NUMBER OF UNITS YOU'LL NEED

1. Measure your current library of sheet music in inches.

Filing cabinets: Measure the depth of the music in each drawer. Total depth is the total inches of all your individual drawers combined (music only).

Open shelving: Measure the total lineal inches of sheet music on each shelf. Music must be stacked standing straight up. Add the total of each shelf to arrive at total depth.

2. Divide total depth by the total capacity of the 6- or 7-shelf unit.

7-shelf unit total capacity = 241½" (613 cm)
6-shelf unit total capacity = 207" (526 cm)

MUSIC LIBRARY INSTALLATION REQUIREMENTS

- Recommended for installation on concrete, epoxy-coated concrete or industrial-grade carpet less a pad.
- Must be attached to a wall - not freestanding.
- Fewer than four units must be placed in a corner.

Music Sorting Rack

Sort your scores by instrument and roll it from your music library to rehearsal or performance. Strong, stable design will stand up to years of use.

- Durable, smooth-rolling swivel casters let you take your sheet music anywhere
- Identifies 46 slots by instrument for easy organization
- Slots are 1" (2.5 cm) wide and 9" (23 cm) front to back
- Color options shown below
- Dimensions: 48" w x 24" d x 35" h (122 cm x 61 cm x 89 cm)

Full instrumentation stickers are included with the sorting rack and provide an excellent organizational tool.

FOLIO CABINETS

San Marcos High School, San Marcos, Texas

Tall Folio Cabinets

Keep all of your folios right where you need them. Tall cabinets easily store up to 100 of your band, orchestra, or choral folios in a single, organized unit. These durable, easy-to-work-with cabinets make the most of every square-inch of space.

USAGE

Keeps all of your folios organized in a stationary cabinet

PERFORMANCE REQUIREMENTS

- Polyester laminate finish for added strength
- Available with adjustable shelves for both choral and band/orchestra

CONSTRUCTION

- Shelf supports are guided by an extruded-aluminum column with black finish
- Shelves constructed of thermofused composite wood
- Shelf spacing is adjustable in 1/2" (1.3 cm) increments from 1" (2.5cm) to 3" (7.5cm) spacing intervals
- Choice of all the color combinations shown on page 67

SHELF SPACING CAPACITY
