

SIGNATURE RISER®

The riser you've always wanted.

After nearly 50 years of building risers, we finally broke the mold. With the new Signature®, Wenger has reinvented the riser with every advantage you can imagine in a single, striking, easy-to-handle design.

Classic black styling. Simple setup. Lightweight. Superb stability. Compact storage. Easy mobility. A four-step model that converts easily from a three-step and fits through a standard doorway. Plus the newest, sturdiest, most manageable reversing design on the market. Backed by a full three-year warranty. It's the only choral riser for your future.

SIGNATURE RISER®

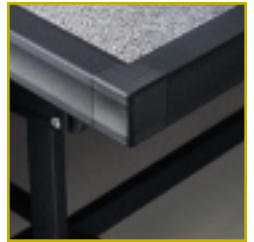

Single-piece aluminum castings provide unparalleled stability.

Our new reversing design uses a simple wing-nut and locking cam lever for ultra-quick assembly that's as strong and stable as a bolt-down connection.

Signature is designed from top-rail to floor to ensure flawless operation and long-lasting good looks. The level of detail is exquisite, with carpet edges protected by structural aluminum extrusions for a finishing touch that adds both distinction and stability.

Both the 3- and 4-step models have a compact footprint. They tuck away into tiny areas, saving you precious storage space. And the Signature 4-step model fits through standard doorways.

Signature is easy for one person to roll and control.

Just maneuver it into place and unfold with a single fluid motion.

It sets up without tools to provide excellent stability.

SIGNATURE® RISER SPECIFICATIONS:

- Single-piece aluminum castings for unparalleled stability and quiet performance.
- Formal black styling is appropriate for any performance or venue.
- Visual design lines are strong, yet elegant, without overpowering the performance.
- Reversing design for superior configuration flexibility.
- Steps attach with a wing-nut and locking cam-lever design that provides the safety of bolted construction without tools.
- Solid backrail with kid-height cross-bar.
- 4-step model fits through a standard doorway and easily converts from the 3-step model.
- Patent pending.
