

MUSIC LAB WORKSTATION

Music Lab Workstation - More comfortable, functional and versatile than ever.

Wenger workstations have been ergonomically designed to be more comfortable by positioning music and computer equipment where they're most accessible, creating an environment where everything is within easy reach.

Wenger workstations are more functional because there's plenty of workspace and room for equipment with unobstructed sightlines and less disruption caused by stacked equipment and tangled cables.

Wenger workstations are more versatile because they're exceptionally mobile. They glide smoothly through any standard doorway. What's more, they are available with an adjustable height frame that can be easily changed based on your height preference. Our workstations will even meet ADA requirements for handicap access.

And like all Wenger products, they're built to last.
